Monarch Powered Land Acquisition for India's Largest Greenfield Project and Newest Aviation Gateway: Navi Mumbai International Airport

Pune, Maharashtra — Monarch Surveyors & Engineering Consultants Ltd., a leading infrastructure consulting firm known for its precision-driven survey, design and engineering prowess, proudly announces its pivotal role in enabling the development of the Navi Mumbai International Airport—India's newest and most anticipated aviation hub.

As part of the strategic infrastructure rollout, Monarch was entrusted with comprehensive land acquisition services, including stakeholder mapping, legal due diligence, compensation structuring, and rehabilitation planning. The firm's deep-rooted experience in geospatial consulting, social impact assessment, and forest diversion services ensured seamless alignment with state and central regulatory frameworks.

Talking about Monarch's approach, Mr Sunil Kokare, Director of Business, said "This project exemplifies Monarch's commitment to nation-building through compliance-led execution and stakeholder-sensitive planning. Our team's ability to navigate complex land dynamics while upholding transparency and governance was instrumental in unlocking this transformative aviation corridor."

The Navi Mumbai International Airport is poised to decongest Mumbai's existing air traffic and catalyse economic growth across the MMR region. Monarch's contribution reinforces its position as a trusted partner in India's infrastructure evolution—bridging technical rigor with institutional accountability.

Key Highlights:

-  Acquisition of over 671 hectares
-  Seamless coordination with CIDCO, MIDC, and local governing bodies
-  Deployment of Monarch's proprietary GIS and digital twin tools for land mapping
-  Zero litigation milestone achieved during acquisition phase

Monarch continues to scale its impact across transportation, urban development, and energy sectors—driven by a vision of operational excellence and strategic alignment with India's infrastructure goals.
